

Virtual Phono Preamp Supported Phono Equalization Curves

The following phono equalization curves are supported by the Diamond Cut Productions Virtual Phono Preamplifier (VPP). They can be implemented either via an RIAA hardware preamplifier or (preferably) a Flat hardware preamplifier. To use these presets, first select the desired preset that most closely fits your record. Next, select the proper “Preamp Hardware” type. You have a choice between Standard RIAA Preamp, Flat Preamp and Line Input/Tapes. The VPP also contains a feature that allows you to transfer (decode) stereo, lateral monophonic records, or vertical cut monophonic records.

- Exact AES LP EQ Curve
- Exact RIAA LP EQ Curve (stereo and monophonic)
- Exact Columbia LP Curve (monophonic - pre-1954)
- Exact Reverse RIAA Curve
- Exact Acoustical Recording 78 EQ Curve (flat)
- Exact American 78 Recording EQ Curve (500 Hz Turnover)
- Exact European 78 Recording EQ Curve (250 Hz Turnover)
